THE SCIENCE OF BEAUTY

Imagine pressing pause on the everyday demands of life, while simultaneously reaping the benefits of the most advanced skincare technology. At Spa Montage Beverly Hills you will experience just this. As the exclusive West Coast partner to L.RAPHAEL Genève, Spa Montage offers targeted yet non-invasive skincare and body services that deliver immediate age-defying results.

L.RAPHAEL

Combining breakthrough technology and scientific advancements, L.RAPHAEL's high tech treatments penetrate deep beneath the surface of skin to address all areas of concern.

OXY STAR ANTI-PIGMENTATION TREATMENT

This advanced oxygen facial uses white truffles to disperse melanin beneath your skin, fading existing sun and age spots, while a collagen mask diminishes lines and wrinkles. Skin looks and feels younger with renewed radiance.

OXY SLIM

This treatment uses an oxygen-infused fat burning serum with black currant seeds and apricot oils to slim and reshape your body. A unique slimming gel and firming body oil are then massaged into your skin reducing the appearance of cellulite, while tightening and toning all over for a slimmer, more youthful physique.
